PROFESSIONAL SUMMARY

My passion is working with extremely talented people and collaborating to make products that will make an immediate impact. I love manipulating software to solve problems or start/finish projects.

Most of my projects have always been about solving new problems and solving them, is where I grew up and have been developing my skills.

I always divide problems into small parts, work on myself to use and learn, if necessary, tools that will make me complete these challenges. I have an excellent work ethic and I love to overcome challenges from which I learn something. Be a full-stack developer is something I've been enjoying more every day. I already lived in Canada in 2018/19, which reflects on my decision to apply for an international job.

I really look forward to making a solid contribution to your team and hope to meet you soon.

WORK EXPERIENCE

Custom Software Engineering Analyst

Aug 2021 – Present

Accenture Brazil • Belo Horizonte, Brazil

At Accenture, I have stood out as a reference for always being able to learn new stacks and eager for knowledge and challenges. I worked on projects such as NaturaCO, SBT Brasil, Santander, Unilever, Gerando Falcões and I am currently on the Arena MRV project.

- In the SBT Brasil project (*Brazilian Television System*) I became a reference in the development of web video players.
- In the Gerando Falcões project, I was the technical leader and, together with my team, world champion of Accenture's internal event - 360o Value Awards.

I have strong knowledge in **Typescript, Node, Nest, Prisma.io, Object-oriented programming (OOP), Next, Shaka-Player, Git/GitHub, Serverless as a Framework, React, Tailwind and RadixUI.**

Software Developer

May 2021 - Aug 2021

VP6 TI Consultancy • Belo Horizonte, Brazil

As a Software Developer, I implemented screens and functionalities dedicated to the needs of clients such as Inter-bank, ViewCO and others. I was very communicative and knew how to be humble when I needed help. Whenever possible, I worked in pair programming with a colleague.

- I worked on the front-end with the **Typescript, CSS, UmiJs, Redux, Context** stacks and some frameworks such as **Bootstrap** and **React / ReactNative**.
- At the back-end, I worked with **Python, Django, Pandas**, integrated with **SQL** and **NoSQL** databases.

EDUCATION

Web and Mobile Development

Jan 2020 - Apr 2021

TRYBE • Belo Horizonte, Brazil

In Trybe's intensive training in Web and Mobile Development, the objective was to learn in a comprehensive way and with a lot of practice (more than 1500 hours) the technical and behavioral skills most demanded by the market,

combined with individualized professional guidance to take the first steps in a technology career.

For more information:

- <https://www.betrybe.com/formacao-desenvolvimento-web>

Licentiate degree, Physics

Jan 2016 - Aug 2018

PUC Minas • Belo Horizonte, Brazil

Degree in physics from the Pontifical Catholic University - *Unfinished*.

The objective was to offer solid theoretical and experimental training and develop intuitive, logical-deductive reasoning, forming a critical and creative teacher, with ethics and social responsibility.

SKILLS

Back-end:

- TypeScript
- Node.js
- Prisma.io
- Nest.Js / Express / Zod / Fastify
